K.E.E.N.E.

City: Berlin/Panama (DE,PN)

Labels: Cacao Records, Get Physical or Exploited Rec.

Biography:

K.E.E.N.E. is the duo formed by the brothers Lloyd and Kevin Keene, who since 2010 have become a referent for house and techno music in Panama.

The K.E.E.N.E. sound is clearly seductive and elegant, taking elements of Deep, House and Techno genres. That unique brotherly complicity is poured into what they do, with their combined musical and technical talents eliminating their possible weaknesses. Both are perfectionists that have found their personal way of making music, a process that is as organic as it is electronic, and you just have to see the dancing through while they dj to understand it.

Besides managing Late Night Music's roster of shows in Panama, K.E.E.N.E. moved to Berlin in 2015 to focus on their production. Currently settled their studio and headquarters at the prestigious Riverside Studios in the heart of Berlin's creative district, they have now also started a Berlin based label called Cacao Records.
